

# GALVANIZE™ CONTACT

*Foliar-applied nutrients for rapid response in the face of external crop stresses.*

Biotechnology is revolutionizing agricultural production, with more sustainable solutions that are less stressful on plants and the environment.

Alltech Crop Science solutions for crop protection provide the balanced nutrition needed for plants' natural defenses, giving them the capacity to defend themselves against various environmental stresses.

Used separately or as part of an integrated pest management program, these solutions support plant vigor so that each crop can reach its maximum yield and quality potential.

*Backed by plant  
nutrigenomic research*

A combination of bacterial metabolites and foliar-applied nutrients essential for plant fortification, GALVANIZE CONTACT is formulated for immediate effect and rapid response in the face of external crop stresses. Well-nourished plants have more effective defense systems.

Reduces the effects of stressful situations that limit plant growth.

Foliar-applied for rapid response.

Complements pest management programs.

OMRI Listed for use in organic crop production.

## GUARANTEED ANALYSIS

Copper (Cu).....	2.0%
Iron (Fe).....	1.6%
Manganese (Mn).....	0.8%
Zinc (Zn).....	3.2%

*Derived from copper sulfate, iron sulfate, manganese sulfate and zinc sulfate*

## Also contains:

- Bacterial fermentation media (microbial food)
- Plant extract (surfactant)

Beneficial microbes and the metabolites they naturally produce can offer new, naturally derived alternatives to conventional chemicals. These products allow for consistent, sustainable crop production that doesn't compromise quality or profitability.

Alltech is a pioneer in nutrigenomics, the study of how plants naturally respond to nutrients and other bioactive compounds at a genetic level. This enables us to formulate fertilizers and biostimulants that activate natural plant mechanisms, optimizing plant health and performance for better quality and greater yields.

## Why use GALVANIZE CONTACT?

### MICROBIAL FERMENTATION MEDIA

GALVANIZE CONTACT is formulated with microbial fermentation media to help tip the scales in favor of healthy plant development and production while avoiding synthetic pesticide residues.

### FOLIAR APPLICATION FOR RAPID EFFECT

Nutrient deficiencies and other external stresses can take a rapid toll on crop vigor and productivity. Foliar application means rapid uptake, transport and utilization by the plant.

## GALVANIZE CONTACT *recommendations for use*

*Always read and follow label directions.  
Confirm state registration prior to use.*

**Apply GALVANIZE CONTACT as a foliar application at 16-32 oz/acre and repeat every 2-3 weeks.**

Dilute in a minimum of 10 gallons of water per acre.

**Always perform compatibility testing when tank-mixing with other chemicals.**

*Contact your local Alltech Crop Science specialist for specific recommendations or with any questions.*

Contact your local Alltech Crop Science specialist for more information.
