

Feed Safety: 6 Questions to Ask

Quality control is critical to feed safety

6 questions to consider to safely introduce essential products from countries of high risk:

- 1 Is the ingredient a necessity?
- 2 What is the level of contamination at the source?
- 3 How long is the transport time?
- 4 What is the half-life of the virus in feed?
- 5 What is the necessary storage time?
- 6 What effects do feed mitigants have on the viral load?

Challenge Spotlight: African swine fever (ASF)
