

MICROBUILD®

Prebiotic fiber for gut health and a healthy microbiome

Benefits of Microbuild

Maximizes gut health

Supports healthy stool quality

Enhances nutrient absorption

Boosts immune response

Recommended inclusion rate

0.5–2 lb./ton for all classes of dog and cat food

100 mg/25 lbs. of body weight in treats and supplements

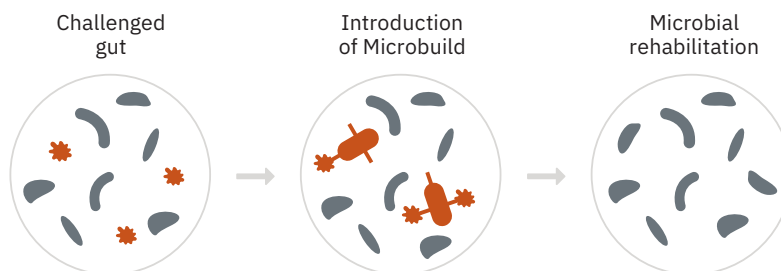

An effective gut health solution for dogs and cats

Microbuild is an innovative prebiotic that nurtures the gut health and overall well-being of pets. Even during bacterial challenges, Microbuild works to increase microbial diversity in the gut, boosting the animal's natural defenses.

Support a healthy gut with Microbuild, see the difference in the stool

Proper functioning of the intestine in pets is a key factor in health and longevity. Microbuild harnesses the power of prebiotics, specialized fibers that promote the growth of beneficial bacteria in the gut. Improved fiber digestibility aids in both nutrient absorption and intestinal integrity and contributes to the development of a healthy immune system.

Microbuild is based on the leading-edge science of nutrigenomics, which studies the unique relationship between genetics and nutrition. Its specific yeast strain, *Saccharomyces cerevisiae*, has been specifically selected by Alltech scientists for maximum efficacy in promoting intestinal health.

Contact your local Alltech representative or email pets@alltech.com for more information.
